Professional Summary

Master of Computer Applications student with a strong foundation in Web technologies and database management. Seeking an entry-level software or web development role where I can apply my technical skills, learn industry best practices, and contribute to building reliable and efficient applications.

Education

Charotar University of Science and Technology

Master of Computer Application
Current CGPA: 7.93

Changa, Gujrat

July 2025 - Present

Veer Narmad South Gujrat University

Master of Computer Application
Final Percentage: 77.00%

Surat, Gujrat

June 2022 – Feb 2025

Jeevan Bharti High School

Higher Secondary Certificate (HSC), Commerce Stream
Final Percentage: 73.00%

Surat, Gujrat

June 2022 – Feb 2025

Technical Skills

- **Programming Language:** Java, JavaScript, SQL, Python
- **Web Technologies:** HTML5, CSS3, React, Node, Express
- **Frameworks/ Libraries:** Servlet, JSP, Django, Flutter
- **Databases:** MySQL, MongoDB, Oracle
- **Developer Tools & Platforms:** Git, GitHub, Visual Studio, VS Code, IntelliJ IDEA
- **Web / Operating System:** Windows, Linux
- **Core Concepts:** Data Structure Algorithms, Object-Oriented Programming, Database Management System, Software Engineering
- **Soft Skills:** Problem-Solving, Collaborative

Projects

Student-Mentor Notes Submission & Assessment System

Dec 2025 – Feb 2026

Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, Cloudinary

- Developed a full-stack web application using MongoDB, Express.js, React.js, and Node.js (MERN) to facilitate structured interaction between students and mentors.
- Implemented secure authentication and authorization using JWT, ensuring protected access for users, mentors, and admin roles.
- Built a file upload system integrated with cloudinary, enabling users to upload and manage submissions efficiently.
- Designed role-based features:
 - Users can upload submissions, view, download, share, and delete notes.
 - Mentors can review and assess submissions.
 - Admin can manage users, notes, and monitor mentor assessments.
- Added advanced functionalities such as searching and sorting for better data accessibility and user experience.
- Developed a centralized admin dashboard for system-wide monitoring and management.
- Ensured responsive UI and smooth user experience using modern frontend practices in React.

Event Management System

Mar 2026 – Present

Tech Stack: Django, Python, SQLite, Tailwind CSS, Cloud Storage, SMTP (Email Service)

- Developed a full-stack web application using Django (MVT architecture) to manage and streamline event booking and administration processes.
- Implemented role-based authentication system for Admin and Users with secure signup and login functionalities.
- Built a comprehensive admin panel to manage events, banners, users, and bookings with full CRUD operations.
- Designed an interactive admin dashboard providing real-time insights such as new registrations, event bookings, and system activity.
- Developed user-side features allowing users to explore events, search events, book tickets, and manage their bookings efficiently.
- Integrated email notification system to send booking confirmation emails upon successful event registration.
- Implemented ticket/pass generation and download functionality for booked events.
- Utilized cloud storage services for managing media files (images, documents) instead of local storage, improving scalability.
- Designed a responsive and modern UI using Tailwind CSS to ensure seamless experience across devices.
- Enhanced user experience with features like event search, profile management, and booking history tracking.

Hobbies

- **Building Personal Projects**
Actively develop web applications using modern technologies to enhance practical skills.
- **Problem Solving & Competitive Coding**
Practice coding challenges on platforms like LeetCode to improve logic building.
- **Exploring API Integrations**
Experimenting with third-party APIs (payments, emails, cloud services) in projects.
