PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and MCA student with hands-on experience building production-ready MERN stack and Django applications. Proficient in Java, JavaScript, Python, React.js, Node.js, and SQL/NoSQL databases. Designed and delivered role-based platforms with JWT authentication, RESTful APIs, cloud storage integrations, and responsive UIs serving multiple user tiers. Foundation in Data Structures & Algorithms, Object-Oriented Programming, and Software Engineering principles. Seeking a challenging Software Developer role to engineer scalable, high-performance systems and contribute to impactful products.

TECHNICAL SKILLS

Languages	Java, JavaScript (ES6+), Python, SQL
Frontend	React.js, HTML5, CSS3
Backend	Node.js, Express.js, Django, REST APIs
Frameworks / Libraries	Flutter (Mobile), Django REST Framework
Databases	MySQL, MongoDB, PostgreSQL, SQLite
Tools & Cloud	Git, GitHub, Cloudinary, VS Code, IntelliJ IDEA, Postman
Core Concepts	Data Structure and Algorithms, Object-Oriented Programming, Database Management System, Software Engineering, Cloud Computing
Soft Skills	Problem-Solving, Team Collaboration, Analytical Thinking, Time Management

PROJECTS

Student-Mentor Notes Submission & Assessment System

Dec 2025 – Feb 2026

Stack: MongoDB, Express.js, React.js, Node.js, JWT, Cloudinary

- Architected a full-stack MERN platform with 3-tier role-based access (User/Mentor/Admin) and JWT authentication securing all API routes.
- Integrated Cloudinary API for cloud-hosted file management — upload, download, share, and delete submissions — eliminating local storage constraints.
- Built a real-time admin dashboard for system-wide monitoring and centralized management; added search, filter, and sort on the notes repository.
- Delivered a fully responsive React.js UI with modern component architecture, ensuring consistent cross-device experience.

Event Management System

Mar 2026 – Jun 2026

Stack: Django (Python), SQLite, Tailwind CSS, Cloud Storage, SMTP

- Developed a production-ready event booking platform using Django MVT, covering end-to-end event discovery, ticketing, and administration.
- Implemented SMTP email notification system for automated booking confirmations and PDF ticket/pass generation for instant digital proof of booking.
- Migrated media assets to cloud storage and built a comprehensive admin panel with CRUD operations and real-time registration/booking metrics dashboard.

EDUCATION

Master of Computer Applications (MCA)

Jul 2025 – Present

Charotar University of Science & Technology, Changa | CGPA: 7.93/10

Bachelor of Computer Applications (BCA)

Jun 2022 – Feb 2025

Veer Narmad South Gujarat University, Surat | Aggregate: 77.00%

ACHIEVEMENTS & ADDITIONAL INFORMATION

- Solved multiple LeetCode problems with a focus on optimal time/space complexity.
- Interests: Full Stack Development, Backend System Design, Competitive Programming
- Independently delivered 2 full-stack production-quality applications with end-to-end ownership from architecture to deployment.
- All projects hosted publicly on GitHub with structured codebases, demonstrating open-source contribution mindset.
- Languages: English (Professional), Gujarati (Native), Hindi (Conversational)
